Functional Group ID=**IN**

Introduction:

This Draft Standard for Trial Use contains the format and establishes the data contents of the Invoice Transaction Set (810) for use within the context of an Electronic Data Interchange (EDI) environment. The transaction set can be used to provide for customary and established business and industry practice relative to the billing for goods and services provided.

Notes:

- 1. Use this transaction set to transmit a public voucher from either a contractor or a Department of Defense (DoD) organization authorized to certify payment to a Federal Government activity responsible for making the payment.*
- 2. Use a single occurrence of this transaction to invoice or provide adjustments for one or more deliveries or service performances, provided to the Federal Government on one or more shipments.*
- 3. Use to transmit public voucher data only from one invoice preparing party to one invoice receiving party.*
- 4. This Implementation Convention is based on converting the Standard Form (SF) 1034A Public Voucher to EDI.*

Transaction Set Notes

1. The BAL segment is to be used only if the code in BIG07 indicates that the transaction is a ``Monthly Adjustment"or ``Special Handling Adjustment" invoice.
2. The QTY segment is used to specify a quantity of units which are expected as payments, e.g., trade-ins or returns.
3. Number of line items (CTT01) is the accumulation of the number of IT1 segments. If used, hash total (CTT02) is the sum of the value of quantities invoiced (IT102) for each IT1 segment.

Segment: **ST** Transaction Set Header
Position: 010
Loop:
Level: Heading
Usage: Mandatory
Max Use: 1
Purpose: To indicate the start of a transaction set and to assign a control number
Syntax Notes:
Semantic Notes: 1 The transaction set identifier (ST01) is used by the translation routines of the interchange partners to select the appropriate transaction set definition (e.g., 810 selects the Invoice Transaction Set).

- 11 If either IT124 or IT125 is present, then the other is required.

Semantic Notes: 1 IT101 is the purchase order line item identification.

Comments:

- 1 Element 235/234 combinations should be interpreted to include products and/or services. See the Data Dictionary for a complete list of ID's.
- 2 IT106 through IT125 provides for ten (10) different product/service ID's for each item. For example: Case, Color, Drawing No., UPC No., ISBN No., Model No., SKU.

Notes: *1. Use multiple iterations of this 2/IT1/010 loop to provide invoice data for each specific line item and another IT1 loop for accounting appropriation data.*

2. Contract Reserve and Adjustments for the line item will be identified in the 2/SAC/180 loops. Major Cost Elements of the line item will be identified in the 2/SLN/200 loops.

3. Accounting appropriation data will be for the total transaction. The accounting appropriation loop of IT1 will be for voucher total distributed by appropriation or ACRN.

4. Use iterations of this segment to identify appropriation data when its IT1 loop has the literal word "ACRN" or cites the actual CLIN/SLIN/ELIN in IT101. Place the appropriation value in SLN06, the ACRN in 2/REF02/210 or appropriation number in 2/REF03/210.

5. Use 235/234 pairs to describe the item being invoiced.

Data Element Summary

Ref.	Data		Attributes
<u>Des.</u>	<u>Element</u>	<u>Name</u>	
IT101	350	Assigned Identification	O AN 1/11

Alphanumeric characters assigned for differentiation within a transaction set

1. Use to identify line item data by the CLIN, SUBCLIN, or ELIN or other number identifying the line item.

2. When used to indicate appropriation data, use term "ACRN".

IT102 358 Quantity Invoiced X R 1/10

Number of units invoiced (supplier units)

1. When loop used to identify a line number data, cite the quantity invoiced.

2. When loop used to indicate appropriation data, do not use this data element.

IT103 355 Unit or Basis for Measurement Code X ID 2/2

Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken

1. When loop used to identify line item data, identify the unit of issue for the quantity listed in IT102.

2. Use any appropriate code, but it must be the same unit of measure as cited in the applicable award instrument.

3. Use code 10, Group, to indicate a service product.

4. When loop used to indicate appropriation data, do not use this data element.

Refer to 003050 Data Element Dictionary for acceptable code values.

IT104 212 Unit Price X R 1/17

Price per unit of product, service, commodity, etc.

1. When loop used to identify line item data, cite the contract or order unit price.

2. When loop used to indicate appropriation data, do not use this data element.

Not Used IT105 639 Basis of Unit Price Code O ID 2/2

Code identifying the type of unit price for an item

IT106 235 Product/Service ID Qualifier X ID 2/2

Code identifying the type/source of the descriptive number used in Product/Service ID (234)

1. Use only codes that were contained in the contract or order. For example, if the item being invoiced was ordered by its National Stock Number (NSN) (code FS), use code FS followed by the National Stock Number of the item. Descriptions should be kept to a minimum essential to identify the item for payment purposes. While any code may be used, listed codes are preferred.

2. IT106 through IT125 are used in pairs. For Example, IT106 will contain a qualifier code and IT107 will contain information related to the qualifying code. So, if IT106 is code FS then IT107 would carry the National Stock Number.
